## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 0 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 0 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office Patent Legal Administration at (703) 305-1383. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

Claims 63 and 66:

The prior art of record does not teach or suggest an indexing button on the force feedback interface device enabling an indexing mode. This is described in applicant's specification at page 12 line 33 to page 13 line 12.

Claims 39, 40, 42-44, 49, 50, 52-54, 61, 62, 64, and 65:

The prior art of record does not teach or suggest when or after a force functionality button is depressed by the user and when the cursor crosses a border of a click surface applying by the actuator a spring force resisting motion of the cursor into said click surface. The closest prior art is Salcudean which at column 9 lines 44-48 describes transferring the tactile sense of pressing a button when the pointer or cursor presses the softbutton, but does not teach the force functionality button and does not teach applying a spring force resisting motion of the cursor as the cursor crosses the border of the click surface into the click surface.

Claims 67-71:

The prior art of record does not teach or suggest a button configured to modify the haptic feedback output when the location of the displayed cursor and displayed graphical object are associated with each other by having the haptic feedback represent a resistive spring force opposing a movement of the cursor displayed on the graphical interface.

Art Unit: 2672

## Claims 72-75:

The prior art of record does not teach or suggest selecting a first type of haptic feedback... when the button is in a first position and selecting a second type of haptic feedback... when the button is in a second position different from the first position.

## Claims 76-78:

The prior art of record does not teach or suggest the haptic feedback being a first haptic-feedback when the button is in a first position and being a second haptic-feedback when the button is in a second position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The claims have been renumbered as follows.
